Författare: Tord Nygren  
ISBN-10: 9789163713422  
Språk: Svenska  
Filstorlek: 2480 KB

**BESKRIVNING**

Congo has a rich and diverse assortment of folk tales. From generation to generation a variety of tales, legends, myths and fables has been passed on. Throughout these tales, the African storyteller describes human failing and virtue, religious representations and the surrounding nature to his listeners. For the storyteller, animals, or objects such as a piece of a clay pot, become amusing and significant representations of human frailty and morality. Bertil Söderberg, Doctor of Philosophy, who spent many years in the Republic of the Congo studying its people and their lives, has accumulated these folk tales and made them accessible to Swedish readers. These tales are not only beneficial to children, but to adults as well. This is the first time that a selection of the Congolese people's cherished folk tales has been made available in Swedish.
