BESKRIVNING

Research on gender aims to contribute towards a better society with the help of scientific tools. Change is therefore a key concept in gender studies. With a wide range of theoretical frameworks, methodological approaches and empirical materials from Sweden, Norway and Iceland, this book investigates how gender relations are shaped, reproduced, and challenged. Collectively, the papers in this volume point to where we are heading in terms of gender relations. Where are the seeds to change, and how does power make possible or impede on change?
